Maximum Marks	5 Marks

Code-Layout, Readability Template

Evaluation of project code quality, structure, and modular components.

Code Quality Checklist

S.No	Parameter	Description	Followed	Remarks
1	Indentation	Consistent use of 4 spaces per indentation level.	Yes	PEP8 compliant.
2	Directory Structure	Organized into Dataset/, notebooks/, models/, and templates/ folders.	Yes	Matches Flask structure.
3	Variable Names	Descriptive names (e.g. input_feature, data_scaled, prediction).	Yes	Enhances code readability.
4	Comments	Explanation of preprocessing, mapping, scaling, and inference.	Yes	Inline docstrings added.
5	Modular Logic	Separation of model training (.ipynb) and web inference (app.py).	Yes	Clean boundary.
6	Error Handling	Input type casting to float and exception fallback mapping.	Yes	Prevents Flask 500 crashes.

Reusable Components

Component Name	Technology	Location Used	Reusability Level
Dynamic Path Resolver	Python os.path	app.py model and scaler loading	High
Categorical Data Mapper	Python dict	app.py preprocessing data pipelines	High
StandardScaler Model	Scikit-learn	app.py input feature scaling	High
